Table of Contents Volume 174, 1988

Number 1

H. Jones, R.A. Leigh, R.G.W. Jones, A.D. Tomos: The integration of whole-root and cellular hydraulic conductivities in cereal roots 1

D. Hodick, A. Sievers: The action potential of *Dionaea muscipula* Ellis 8

J. Vangronsveld, H. Clijsters, M. Van Poucke: Phytochrome-controlled ethylene biosynthesis of intact etiolated bean seedlings 19

G. Ducreux, B. Kloareg: Plant regeneration from protoplasts of *Sphacelaria* (Phaeophyceae) 25

A. Makino, T. Mae, K. Ohira: Differences between wheat and rice in the enzymic properties of ribulose-1,5-bisphosphate carboxylase/oxygenase and the relationship to photosynthetic gas exchange 30

R. Pressey: Reevaluation of the changes in polygalacturonases in tomatoes during ripening 39

O. Pantoja, C.M. Willmer: Redox activity and peroxidase activity associated with the plasma membrane of guard-cell protoplasts 44

C. Giannakis, D.J.D. Nicholas, W. Wallace: Utilization of nitrate by bacteroids of *Bradyrhizobium japonicum* in the soybean root nodule 51

M. El-Jack, A. Mackenzie, P.M. Bramley: The photoregulation of carotenoid biosynthesis in *Aspergillus giganteus* mut. *alba* 59

R.D. Preston: Cellulose-microfibril-orienting mechanisms in plant cells walls 67

R. Oelmüller, C. Schuster, H. Mohr: Physiological characterization of a plastidic signal required for nitrate-induced appearance of nitrate and nitrite reductases 75

H. Peña-Cortes, J. Sanchez-Serrano, M. Rocha-Sosa, L. Willmitzer: Systemic induction of proteinase-inhibitor-II gene expression in potato plants by wounding . . 84

H. Gerbling, B. Gerhardt: Carnitine-acyltransferase activity of mitochondria from mung-bean hypocotyls . . 90

M.E. Bossen, H.H.A. Dassen, R.E. Kendrick, W.J. Vredenberg: The role of calcium ions in phytochrome-controlled swelling of etiolated wheat (*Triticum aestivum* L.) protoplasts 94

M. Bokern, D. Strack: Synthesis of hydroxycinnamic acid esters of betacyanins via 1-O-acylglucosides of hydroxycinnamic acids by protein preparations from cell suspension cultures of *Chenopodium rubrum* and petals of *Lampranthus sociorum* 101

S.C. Jupe, D.R. Causton, I.M. Scott: Cellular basis of the effects of gibberellin and the *pro* gene on stem growth in tomato 106

J.E. Taylor, D.G. Grosskopf, B.A. McGaw, R. Horgan, I.M. Scott: Apical localization of 1-amino-cyclopropane-1-carboxylic acid and its conversion to ethylene in etiolated pea seedlings 112

M. Feyerabend, E.W. Weiler: Characterization and localization of fusicoccin-binding sites in leaf tissues of *Vicia faba* L. probed with a novel radioligand 115

K.J. Oparka, K.M. Wright: Osmotic regulation of starch synthesis in potato tubers? 123

M. Riederer, J. Schönherr: Development of plant cuticles: fine structure and cutin composition of *Clivia miniata* Reg. leaves 127

Number 2

R.K. Monson, J.A. Teeri, M.S.B. Ku, J. Gurevitch, L.J. Mets, S. Dudley: Carbon-isotope discrimination by leaves of *Flaveria* species exhibiting different amounts of C_3- and C_4-cycle co-function 145

D.H. Greer, W.A. Laing, T. Kipnis: Photoinhibition of photosynthesis in intact kiwifruit (*Actinidia deliciosa*) leaves: Effect of temperature 152

D.H. Greer, W.A. Laing: Photoinhibition of photosynthesis in intact kiwifruit (*Actinidia deliciosa*) leaves: Recovery and its dependence on temperature 159

D.A. Grantz, A. Schwartz: Guard cells of *Commelina communis* L. do not respond metabolically to osmotic stress in isolated epidermis: Implications for stomatal responses to drought and humidity 166

H. Kubo, H. Mihara: Phototropic fluence-response curves for *Pilobolus crystallinus* sporangiophore 174

J.W. Radin, D.L. Hendrix: The apoplastic pool of abscisic acid in cotton leaves in relation to stomatal closure 180

M.R. Blatt: Mechanisms of fusicoccin action: A dominant role for secondary transport in a higher-plant cell . . 187

M. Stanzel, R.D. Sjolund, E. Komor: Transport of glucose, fructose and sucrose by *Streptanthus tortuosus* suspension cells. I. Uptake at low sugar concentration 201

M. Stanzel, R.D. Sjolund, E. Komor: Transport of glucose, fructose and sucrose by *Streptanthus tortuosus* suspension cells. II. Uptake at high sugar concentration 210

M. Stitt, I. Wilke, R. Feil, H.W. Heldt: Coarse control of sucrose-phosphate synthase in leaves: Alterations of the kinetic properties in response to the rate of photosynthesis and the accumulation of sucrose 217

L.M.S. Palni, L. Burch, R. Horgan: The effect of auxin concentration on cytokinin stability and metabolism 231

T. Yasuda, T. Kuroiwa, T. Nagata: Preferential synthesis of plastid DNA and increased replication of plastids in cultured tobacco cells following medium renewal 235

P. Matile, R. Altenburger: Rhythms of fragrance emission in flowers 242

R. Altenburger, P. Matile: Circadian rhythmicity of fragrance emission in flowers of *Hoya carnosa* R. Br. 248

R.C. Leegood, S. von Caemmerer: The relationship between contents of photosynthetic metabolites and the rate of photosynthetic carbon assimilation in leaves of *Amaranthus edulis* L. 253

D. Werner, E. Mörschel, C. Garbers, S. Bassarab, R.B. Mellor: Particle density and protein composition of the peribacteroid membrane from soybean root nodules is affected by mutation in the microsymbiont *Bradyrhizobium japonicum* 263

L. Faye, J.S. Greenwood, E.M. Herman, A. Sturm, M.J. Chrispeels: Transport and posttranslational processing of the vacuolar enzyme α-mannosidase in jack-bean cotyledons 271

K. Mendgen, P. Nass: The activity of powdery-mildew haustoria after feeding the host cells with different sugars, as measured with a potentiometric cyanine dye 283

Number 3

C. Schuster, R. Oelmüller, R. Bergfeld, H. Mohr: Recovery of plastids from photooxidative damage: Significance of a plastidic factor 289

P.J. Gruber, K.A. Sweeney, S.E. Frederick: The detection of fucose residues in plant nuclear envelopes 298

M.L. Ortiz-Castellanos, J.F. Gutierrez-Corona: The sensitive period for light and temperature regulation of sporangiophore development in *Phycomyces* 305
L.M. Corrochano, E. Cerdá-Olmedo: Photomorphogenesis in *Phycomyces*: Dependence on environmental conditions 309
L.M. Corrochano, P. Galland, E.D. Lipson, E. Cerdá-Olmedo: Photomorphogenesis in *Phycomyces*: Fluence-response curves and action spectra 315
J.P. Stafstrom, L.A. Staehelin: Antibody localization of extensin in cell walls of carrot storage roots 321
J.P. Gogarten: Physical properties of the cell wall of photoautotrophic suspension cells from *Chenopodium rubrum* L. 333
B. M'Batchi, S. Delrot: Stimulation of sugar exit from leaf tissues of *Vicia faba* L. 340
M. Gogarten-Boekels, J.P. Gogarten, F.-W. Bentrup: Sugar nucleotides dissipate ATP-generated transmembrane pH gradient in Golgi vesicles from suspension-cell protoplasts of *Chenopodium rubrum* L. 349
E.B. Tucker: Inositol bisphosphate and inositol trisphosphate inhibit cell-to-cell passage of carboxyfluorescein in staminal hairs of *Setcreasea purpurea* 358
U. Vögeli, F. Meins, Jr., T. Boller: Co-ordinated regulation of chitinase and β-1,3-glucanase in bean leaves 364
R. Schmid, M. Tünnermann, E.-M. Idziak: Transient reduction of responsiveness of blue-light-mediated hair-whorl morphogenesis in *Acetabularia mediterranea* induced by blue light 373
D. Vreugdenhil, E.A.M. Koot-Gronsveld: Characterization of phloem exudation from castor-bean cotyledons 380
G. Caetano-Anollés, W.D. Bauer: Enhanced nodule initiation on alfalfa by wild-type *Rhizobium meliloti* co-inoculated with *nod* gene mutants and other bacteria 385
R. Grimm, C. Eckerskorn, F. Lottspeich, C. Zenger, W. Rüdiger: Sequence analysis of proteolytic fragments of 124-kilodalton phytochrome from etiolated *Avena sativa* L.: Conclusions on the conformation of the native protein 396
N.K. Given, M.A. Venis, D. Grierson: Hormonal regulation of ripening in the strawberry, a non-climacteric fruit 402
R.F. Sage, T.D. Sharkey, J.R. Seemann: The in-vivo response of the ribulose-1,5-bisphosphate carboxylase activation state and the pool sizes of photosynthetic metabolites to elevated CO_2 in *Phaseolus vulgaris* L. 407
A.J.J. van den Berg, M.H. Radema, R.P. Labadie: Influence of acetate and malonate on the production of 1,8-dihydroxyanthracene derivatives in suspension cultures of *Rhamnus purshiana* 417
G. Ruyters: Light-stimulated respiration in the green alga *Dunaliella tertiolecta*: Involvement of the ultraviolet/blue-light photoreceptor(s) and phytochrome? . . . 422
C. Schuster, R. Oelmüller, H. Mohr: Control by phytochrome of the appearance of ribulose-1,5-bisphosphate carboxylase and the mRNA for its small subunit . . 426
onan I and xyloglucan during cell expansion and cytokinesis in *Trifolium pratense* L.; implication for secretory pathways 433
R.J. Cyr, B.-L. Lin, J.A. Jernstedt: Root contraction in hyacinth. II. Changes in tubulin levels, microtubule number and orientation associated with differential cell expansion 446
V. Friemert, D. Heininger, M. Kluge, H. Ziegler: Temperature effects on malic-acid efflux from the vacuoles and on the carboxylation pathways in Crassulacean-acid-metabolism plants 453
J.A. Smith, M.R. Krauss, C. Borkird, Z.R. Sung: A nuclear protein associated with cell divisions in plants . . 462
C.G. Spyropoulos, J.S. Grant Reid: Water stress and galactomannan breakdown in germinated fenugreek seeds. Stress affects the production and the activities in vivo of galactomannan-hydrolysing enzymes . . . 473
R. Benz, K.-H. Büchner, U. Zimmermann: Mobile charges in the cell membranes of *Halicystis parvula* 479
J.-L. Prioul, A. Reyss: Rapid variations in the content of the RNA of the small subunit of ribulose-1,5-bisphosphate carboxylase of mature tobacco leaves in response to localized changes in light quantity. Relationships between the activity and quantity of the enzyme 488
H. Felle: Auxin causes oscillations of cytosolic free calcium and pH in *Zea mays* coleoptiles 495
S.P.C. Groot, B. Kieliszewska-Rokicka, E. Vermeer, C.M. Karssen: Gibberellin-induced hydrolysis of endosperm cell walls in gibberellin-deficient tomato seeds prior to radicle protrusion 500
B. Piechulla: Differential expression of nuclear- and organelle-encoded genes during tomato fruit development 505
M.G. Organ, J.S. Greenwood, J.D. Bewley: Phytin is synthesized in the cotyledons of germinated castor-bean seeds in response to exogenously supplied phosphate 513
Y. Mineyuki, S.M. Wick, B.E.S. Gunning: Preprophase bands of microtubules and the cell cycle: Kinetics and experimental uncoupling of their formation from the nuclear cycle in onion root-tip cells 518
M.U.F. Kirschbaum, R.W. Pearcy: Concurrent measurements of oxygen- and carbon-dioxide exchange during lightflecks in *Alocasia macrorrhiza* (L.) G. Don . . . 527
I.U. Flügge, K.C. Woo, H.W. Heldt: Characteristics of 2-oxoglutarate and glutamate transport in spinach chloroplasts. Studies with a double-silicone-layer centrifugation technique and in liposomes 534
J. Feierabend, W. Schlüter, K. Tebartz: Unassembled polypeptides of the plastidic ribosomes in heat-treated 70S-ribosome-deficient rye leaves 542
R.C. Nolan, T.-H.D. Ho: Hormonal regulation of gene expression in barley aleurone layers. Induction and suppression of specific genes 551
A.M. Monteiro, A. Crozier, G. Sandberg: The biosynthesis and conjugation of indole-3-acetic acid in germinating seed and seedlings of *Dalbergia dolichopetala* . . 561

Number 4

P.J. Moore, L.A. Staehelin: Immunogold localization of the cell-wall-matrix polysaccharides rhamnogalactur-

Indexed in *Current Contents*
